

WIDER FUNCTIONALITIES FOR GP-G10

SILVER – BRASS can be now processed

SP211 NEW COMPOUND developed for **SILVER AND BRASS** jewellery grinding and polishing ON GP-10, (for gold alloys only up to now)

Medium/small productions of silver/brass jewellery can be now processed with the GP-G10 gold machine, until the production justify to invest in a PMG which is the high production machine for silver/brass, **obtaining as well high quality finish**

So

Medium/small manufacturers working several metals are now able to process them on the same machine

It there is no change on the machine, only compound and accessories to change from gold to silver or vice versa, an integral cleaning is needed
